

Erratum to “Comparative survival and toxicity profiles of oxaliplatin-based adjuvant regimens in stage II-III colorectal cancer: a retrospective dual-institution study”

 Neslihan Özyurt

Department of Medical Oncology, Ordu University Training and Research Hospital, Ordu, Türkiye

Dear Editor,

I am writing regarding my recently published article entitled “Comparative survival and toxicity profiles of oxaliplatin-based adjuvant regimens in stage II-III colorectal cancer: a retrospective dual-institution study” (DOI: 10.32322/jhsm.1840576).

Upon review of the published version of the article, I identified an error in the “study design and population” section regarding the institutional source of the patient cohort. The institution where the patients were treated between January 1998 and December 2009 was incorrectly stated in the published version, presumably due to an error during the publication process.

The sentence:

“Eligible patients were treated at Ordu University Faculty of Medicine between January 1998 and December 2009 and at Ordu University Training and Research Hospital between January 2009 and February 2025.”

Should be corrected as follows:

“Eligible patients treated at Gazi University Faculty of Medicine between January 1998 and December 2009 and at Ordu University Training and Research Hospital between January 2009 and February 2025 were screened for eligibility.”

This correction is limited to the accurate reporting of the institutional origin of the patient cohort. It does not affect the study design, patient eligibility criteria, statistical analyses, results, conclusions, or scientific interpretation of the article.

I kindly request the publication of this erratum to ensure the accuracy and transparency of the scientific record. I apologize for any confusion this error in the published version may have caused and appreciate the editorial office’s consideration of this correction.

Sincerely,

Neslihan Özyurt
